Unsupported Discriminator Type

Severity: error
Implementation: com.nomagic.magicdraw.dds.validation.UnsupportedDiscriminatorTypesRule
Qualified name: DDS::Validation::DDS_Unsupported_Discriminator_Types

Description: Union Cases must define discriminator values that can be parsed into their parent Union’s discriminator type. In DDS, a discriminator can either be a number or a string. A discriminator is used to differentiate at runtime the possible types of a union. Last updated 2020-10-26 16:13:23 +0100
