This is the home page of Cameo Systems Modeler documentation.

Cameo Systems Modeler is based on the award-winning MagicDraw modeling platform. The solution retains all the best diagramming, collaboration, persistence, and documentation capabilities while offering more customized capabilities tailored to **systems engineering** needs.

The documentation of Cameo Systems Modeler is a package that includes the documentation of these products and plugins:

### MagicDraw Documentation

Introduces the main features of modeling tool: working with projects, UML 2 modeling and diagramming, collaboration capabilities, and many more core features.

### SysML Plugin Documentation

Provides descriptions of SysML diagrams and elements, plus introduces SysML specific features as well as gives guidelines for building systems.

### Cameo Requirements Modeler Plugin Documentation

Guides you through the import, export, and management of SysML requirements.

### Cameo Simulation Toolkit Documentation

Installation and licensing
