

# Realized Service Exchange wizard

To open the **Realized Service Exchange** wizard

- Do one of the following:
  - On the diagram pane, select the Service Association and on the smart manipulator toolbar, click .
  - Click  and on the diagram pane, connect Services.

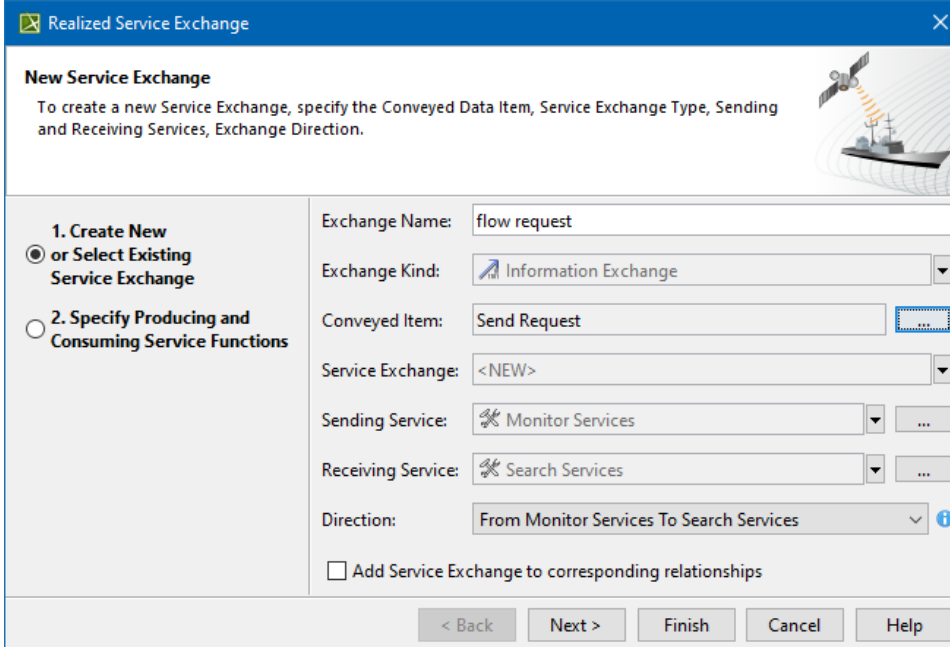

The **Realized Service Exchange** wizard consists of two steps:

- 1 [Service Exchange creation \(mandatory\)](#)
- 2 [Producing and Consuming Service Functions specification \(optional\)](#)

## Service Exchange creation (mandatory)

This step is designed to create a new Service Exchange by specifying a conveyed Service Exchange Item, both sending and receiving Services, and a direction of a Service Exchange. Depending on a fact, if selected Services are known or not, requested information differs:

- If sending and receiving Services are unknown from the wizard invocation context, you need to specify both.

**Realized Service Exchange**

**New Service Exchange**

To create a new Service Exchange, specify the Conveyed Data Item, Service Exchange Type, Sending and Receiving Services, Exchange Direction.

**1. Create New or Select Existing Service Exchange**

☒ 1. Create New  
☐ 2. Specify Producing and Consuming Service Functions

Exchange Name:

Exchange Kind:

Conveyed Item:

Service Exchange:

Sending Service:

Receiving Service:

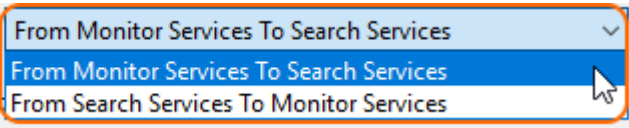

Direction:

☐ Add Service Exchange to corresponding relationships

< Back Next > Finish Cancel Help

- If sending and receiving Services are known, they are added to a **Realized Service Exchange** wizard automatically.

Box	Description												
Exchange Kind	Shows the type of exchanged items: <ul style="list-style-type: none"> <li>• Information Exchange</li> <li>• Configuration Exchange</li> <li>• Energy Exchange</li> <li>• Materiel Exchange</li> <li>• Organizational Exchange</li> </ul>												
Conveyed Item	One or more Service Exchange Items to be conveyed by the information flow from the sending Service to receiving Service. <table border="1"> <thead> <tr> <th>Exchange Kind</th><th>Conveyed Item</th></tr> </thead> <tbody> <tr> <td>Information Exchange</td><td> <ul style="list-style-type: none"> <li>• Service Signal</li> <li>• Operational Information</li> </ul> </td></tr> <tr> <td>Configuration Exchange</td><td> <ul style="list-style-type: none"> <li>• Resource Architecture</li> </ul> </td></tr> <tr> <td>Energy Exchange</td><td> <ul style="list-style-type: none"> <li>• Natural Resource</li> </ul> </td></tr> <tr> <td>Materiel Exchange</td><td> <ul style="list-style-type: none"> <li>• Resource Artifact</li> </ul> </td></tr> <tr> <td>Organizational Exchange</td><td> <ul style="list-style-type: none"> <li>• Organizational Resources</li> </ul> </td></tr> </tbody> </table>	Exchange Kind	Conveyed Item	Information Exchange	<ul style="list-style-type: none"> <li>• Service Signal</li> <li>• Operational Information</li> </ul>	Configuration Exchange	<ul style="list-style-type: none"> <li>• Resource Architecture</li> </ul>	Energy Exchange	<ul style="list-style-type: none"> <li>• Natural Resource</li> </ul>	Materiel Exchange	<ul style="list-style-type: none"> <li>• Resource Artifact</li> </ul>	Organizational Exchange	<ul style="list-style-type: none"> <li>• Organizational Resources</li> </ul>
Exchange Kind	Conveyed Item												
Information Exchange	<ul style="list-style-type: none"> <li>• Service Signal</li> <li>• Operational Information</li> </ul>												
Configuration Exchange	<ul style="list-style-type: none"> <li>• Resource Architecture</li> </ul>												
Energy Exchange	<ul style="list-style-type: none"> <li>• Natural Resource</li> </ul>												
Materiel Exchange	<ul style="list-style-type: none"> <li>• Resource Artifact</li> </ul>												
Organizational Exchange	<ul style="list-style-type: none"> <li>• Organizational Resources</li> </ul>												
Service Exchange	<p>Service Exchange that specifies an information flow for specified conveyed items.</p> <p>If you select an existing Service Exchange from the drop-down list, Conveyed Item and Direction boxes will be filled with corresponding information automatically. You will be able to edit the values of conveyed items.</p> <p>The direction of the information flow won't be editable.</p> <div>  Available, if sending and receiving Services are known from the wizard invocation context. </div>												
Sending Service	Service that sends the specified conveyed information.												

	<p> Available, if a Service is unknown from the wizard invocation context.</p>
<b>Receiving Service</b>	<p>Service that receives the specified conveyed information.</p> <p> Available, if a Service is unknown from the wizard invocation context.</p>
<b>Direction</b>	<p>The direction of the information flow.</p> <p><b>Direction:</b> </p> <p><input type="checkbox"/> Add Service Exchange</p> <p>After changing the direction from the default one, the sending resource will be switched with the receiving resource. The direction of the Resource Exchange will be changed accordingly.</p> <p> In the <b>Direction</b> drop-down list, you can choose the direction of flow, i.e. what type of element is the sender and what type of element is the receiver. The drop-down list is not applicable if the source and target are the same element and the direction cannot be specified.</p>
<b>Add Service Exchange to corresponding relationships</b>	<p>Select the check box, if you want to add the Service Exchange to corresponding relationships existing in other related diagrams.</p>

## Producing and Consuming Service Functions specification (optional)

This step is designed to specify Producing and Consuming Service Functions for the created or selected Service Exchange. Service Exchanges are produced and consumed by Service Functions acting under the Services.

 **Realized Service Exchange**

### Specify Producing & Consuming Service Functions

To specify Producing and Consuming Service Functions for selected Service Exchange, select Service Functions from Drop Down Lists in the table cells.

1. Create New  
or Select Existing  
Service Exchange

☐

2. Specify Producing and  
Consuming Service Functions

☒

Add
Remove From Table
