

Copying roles and assignments

When you want to assign the same roles or assignments that belong to a user or a user group to another user or user group, you can quickly do so by copying them using the **User** pane. This section shows you how to copy user roles and assignments using the **Role Assignments** pane on the **User** pane.

To copy roles and/or assignment(s) from one user to another

1. On the **User** application, click the target user to open the **User** pane.
2. In the **Roles** card, click **Change**.
3. Select the **Copy assignments** tab.
4. In the search box, start typing the name of the user whose assignments you want to copy.
5. Select a username from the search result list. All the roles and assignments associated with the selected user will be automatically copied.

6. Click **? Unknown Attachment** to save the changes.
