Elements simulation
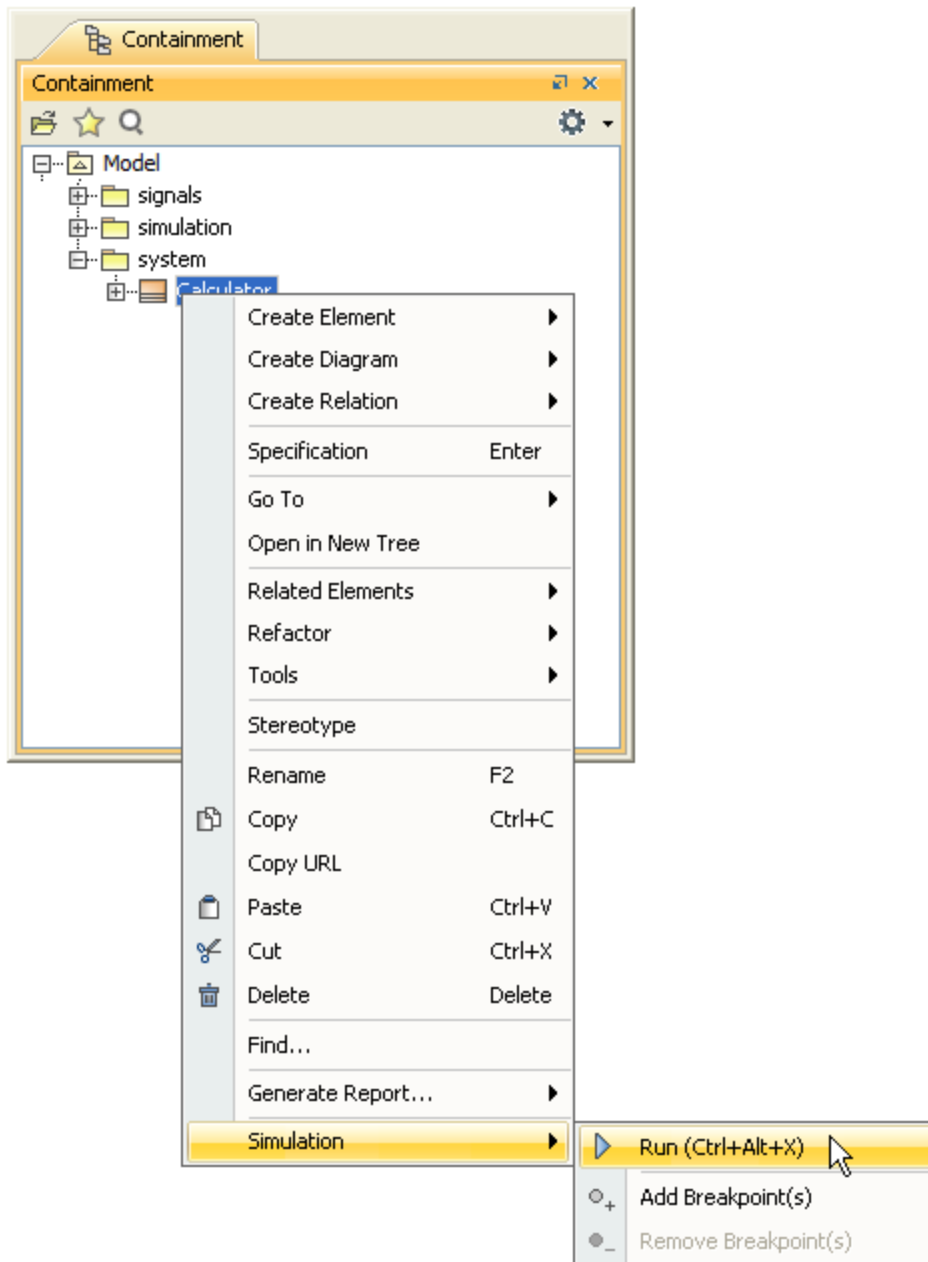

On this page

You can run a model simulation through the shortcut menu and the diagram toolbar.

To run a model simulation through the shortcut menu
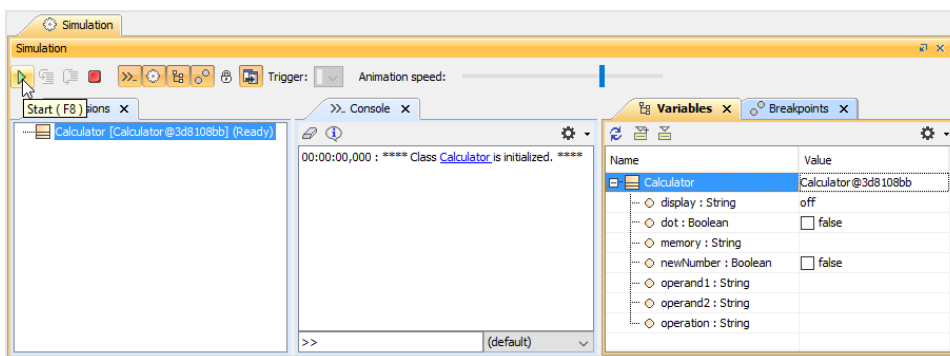

1. Do one of the following:
   - Right-click an element shape on a diagram and select **Simulation** > **Run**.
   - Right-click an element in the Containment tree and select **Simulation** > **Run.**
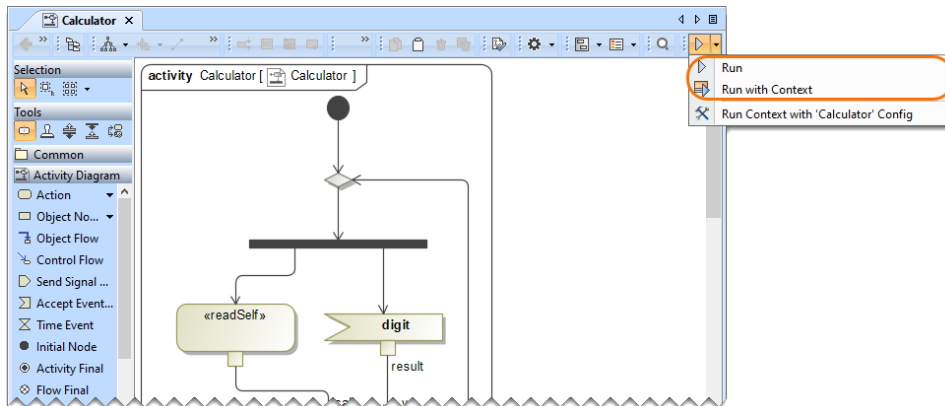

2. In the toolbar of the open **Simulation** window, click to run the model.

To run a model through the diagram toolbar

1. Do any of the following:
   - In the diagram toolbar, click the **Run** or **Run with Context** button to run a diagram whose context is Class or Behavior (Composite Structure diagram, Activity diagram, State-Machine diagram, Use Case diagram, or Sequence diagram). Magic Model Analyst will run the class or the behavior which is the context of the diagram.

   - In a Class or a Package diagram, select the element you want to run and click the **Run** or **Run with Context** button on the diagram toolbar. Magic Model Analyst will run the selected element on the diagram.

2. In the toolbar of the open **Simulation** window, click the **Start** button to run the model.
