Resource Exchange Kind

Description

Enumeration of the possible kinds of resource exchange applicable to a ResourceExchange. Its enumeration literals are:

- ResourceCommunication - Indicates that the ResourceExchange associated with the ResourceExchangeKind is an implementation of the logical flow of data between Resources.
- ResourceMovement - Indicates that the ResourceExchange associated with the ResourceExchangeKind is an implementation of the logical flow of Resources between Resources.
- ResourceEnergyFlow - Indicates that the ResourceExchange associated with the ResourceExchangeKind is an implementation of the logical flow of natural resources between Resources.
- GeoPoliticalExtentExchange - Indicates that the ResourceExchange associated with the ResourceExchangeKind is an implementation of logical flow where GeoPoliticalExtents (i.e., Borders) flow from one place to another.
