

Stop using 3DEXPERIENCE project in your project

If you no longer need to use a project, you can easily remove it from your project usages.

Removal is complete; all references to the elements stored in the used project will be eliminated.

Before you attempt to stop using a project, make sure other users are not currently creating usages to this project.

To stop using a project in your project

1. [Lock the used project](#) you want to stop using.
2. On the main menu, click **Collaborate > Project Usages > Project Usages**.
3. Select the used project and click the  button.

Shortcut menu

This step can be done via a shortcut menu. Right-click the project and then select **Remove**.

4. Wait while the removal completes.
5. Click **OK**.

The project is no longer used in your project and will disappear from the Model Browser of your project.
