Publishing from graphical user interface

Publishing a model from the graphical user interface is a quick way to share it on the web with other team members or stakeholders.

Publishing prerequisites be able to publish models to Cameo Collaborator for Teamwork Cloud:

Project permissions en Project permissions reamwork Cloud project permissions. When you update a document, project permissions are not affected.

Diagram export options can specify the diagram export options, such as dimensions and building time (the latter applies only to tables and matrices), in the Project Options

dialog. See the เป็นสู่เสลา เกลอสุก อังอักกัฐ คืออักกัฐ คือ อักกัฐ ค

To publish a Came of Gellebseafter defined for your modeling. It is recommended to set a larger heap size value than the one defined for your modeling

Start your modeling tool and open the model you want to publish.
 Save and close the file.

Publishing from a historical version of a model can publish a Cameo Collaborator document from a historic version of a model as well. However note that the commenting, editing, and

- comment import functionalities in such a document will be disabled:

 1 million element model 15 GB of RAM

 2. In the main menu, select Tools > Cameo Collaborator > Publish.
- 3. In the Cameo Collaborator Bublishes dia Rylyspecify the following properties:
 - Document name enter the name of the published document. By default, the document name is the same as the model name.
 - Category name select the Teamwork Cloud category where the published document will be stored.
 - and select the Package or several Packages containing the data you want to publish.
 - Template select the template for publishing. You can select one of the predefined templates or a custom template used in your model.

Click if you want to select a locally stored template or a template stored in Teamwork Cloud.

Updating projects update a published model, specify the same template that you used before. Otherwise, the navigation between comments and commented items will be corrupted. To restore corrupted navigation, update the document again using the initial template.

- 4. If needed, change the following options (click the **Options** button to see the full option list):
 - Select the Coments in project check-box, to save Cameo Collaborator comments in the project as model elements.

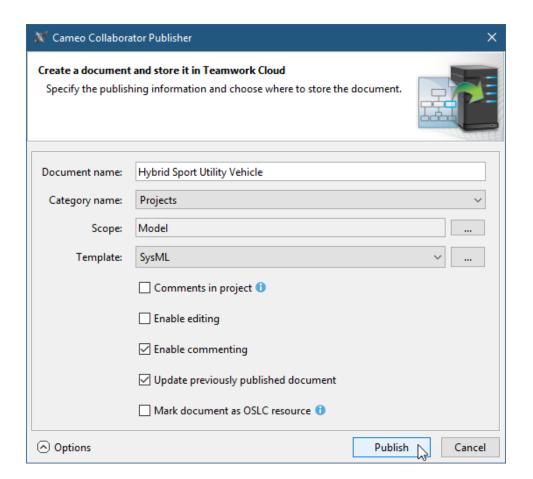

Saving comments in the project comments in the project when updating a document, you can migrate the existing

comments from the document to the project. However, you will not be able to migrate the comments from the project back to the

- Select the Final eventual release to the selection of the
- Select the Enable commenting check-box, to allow reviewers to create comments in a Cameo Collaborator document.
- Selected by the comment previously published project check-box, to update the document previously published from this model with the same name. If you select this check box when publishing a model for the first time, the model will be published as new.

Projects reverted to an earlier version when by the projects reverted to an earlier version and then committed to Teamwork Cloud. If you update a ent from the model that has been reverted to an earlier version (without the template used in it), you will corrupt the navigatio

- Select the Mark document as OSLC resource check-box to publish the model as an OSLC resource.
- Click the Publish button.

Wait until you get the message that the document is successfully published, as publishing a large model may take some time.

Getting document URL message that a document is successfully published contains links allowing you to copy the document URL or open it. For the links to work, in the main menu, select Options > Environment, select the Cameo Collaborator option group on the left side of the Environment Options dialog, and

Related pageseo Collaborator URL.
