

# Disabling inbound network activity

Note that after disabling inbound network activity, you will not be able to open the modeling tool Help or submit an issue.

## Useful information

If you disable inbound network activity, double-clicking a project file (.mdzip) opens the project in a new modeling tool window.

To disable inbound network activity

1. Go to `<modeling tool installation directory>\bin` and open the properties file, e.g., `magicdraw.properties`.
2. In the `JAVA_ARGS` line, add the following argument:

```
-DDISABLEINBOUNDCON=true
```

3. Save and close the file.
