

# Creating SvcV-8 diagram

To create a SvcV-8 diagram

---

- 1 [Create new Version Of Configuration](#)
- 2 [Define the resource for the Version Of Configuration](#)
- 3 [Specify Actual Project Milestones of the resource](#)

## Create new Version Of Configuration

To create new Version Of Configuration in SV-8 diagram

---

1. Click the **Add New** button and select Version of Configuration.
2. Type the name of the newly created Version of Configuration.

## Define the resource for the Version Of Configuration

To define the resource for the Version Of Configuration

---

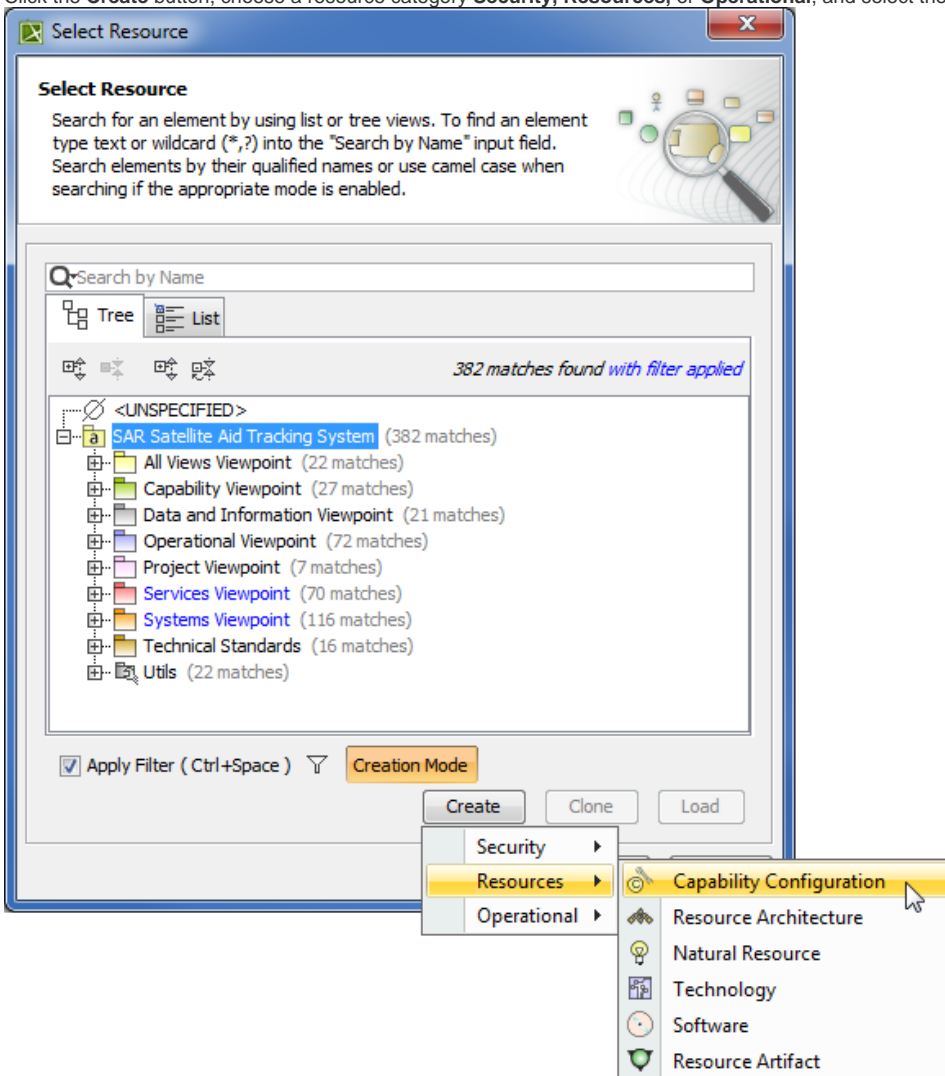

1. Right-click the Version Of Configuration in the diagram pane and select **Resource**.
2. In the **Select Resource** dialog do one of the following:
  - Select an existing resource that has milestones defined.
  - Create new resource (described in the following procedure).

To create new resource for the Version Of Configuration

---

1. In the **Select Resource** dialog switch on the **Creation Mode**.
2. Select package where you want to create a resource.

- Click the **Create** button, choose a resource category **Security**, **Resources**, or **Operational**, and select the desired resource.

- In the Specification window of the newly created resource, type its name.

## Specify Actual Project Milestones of the resource

 Each resource must have two Actual Project Milestone properties defined:

- Version Released At Milestone (defines the start of a period, Kind - InService).
- Version Withdrawn At Milestone (defines the end of a period, Kind - OutOfService).

To specify Actual Project Milestones of the resource

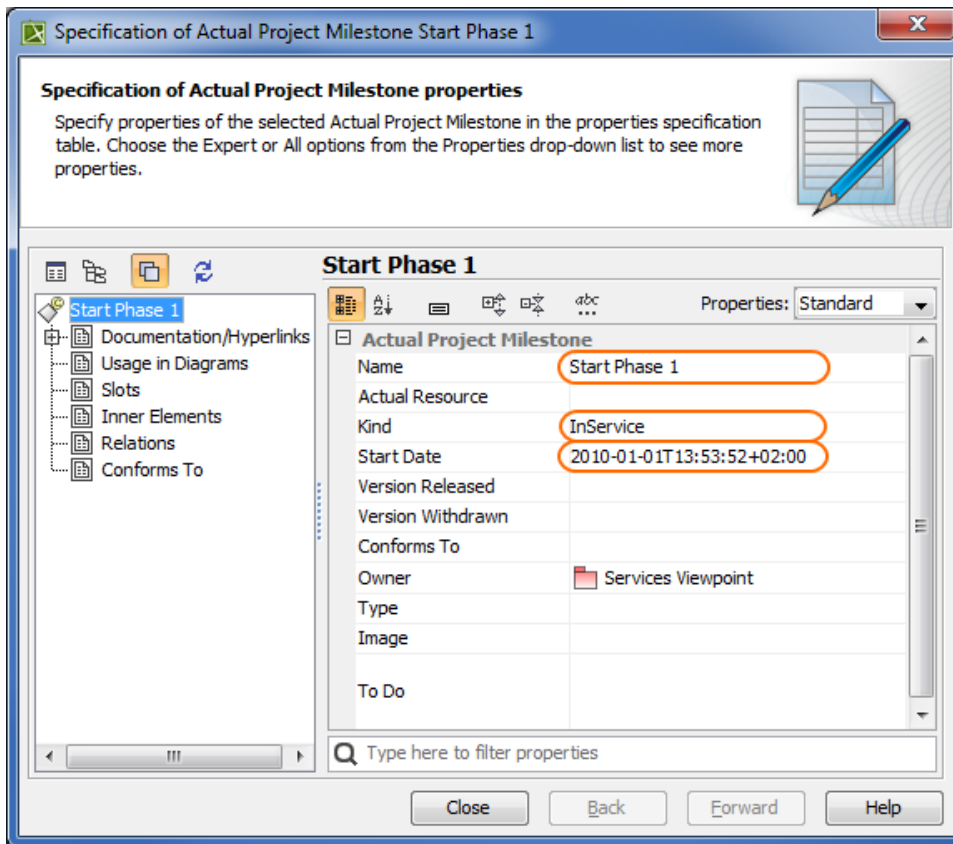

- In the Specification window of the newly created resource, specify:
  - the **Version Released At Milestone** property. Click  to open the **Select Actual Project Milestone** dialog and do one of the following:
    - Select an existing milestone defined with kind In Service.
    - Create new milestone (described in the following procedure "To create new milestone with kind In Service").
  - the **Version Withdrawn At Milestone** property. Click  to open the **Select Actual Project Milestone** dialog and do one of the following:
    - Select an existing milestone defined with kind Out Of Service.
    - Create new milestone (described in the following procedure "To create new milestone with kind Out Of Service").
- Click **Close > OK**.  
The Actual Project Milestone is specified.

To create new milestone with kind In Service

1. In the **Select Actual Project Milestone** dialog, switch on the **Creation Mode**.
2. Select package where you want to create an Actual Project Milestone.
3. Click **Create**.

4. In the Specification window of the newly created Actual Project Milestone specify three properties:
  - a. Name. Type a name of the Actual Project Milestone.
  - b. Start Date. Define the start of a period. Select the Date property value cell and click . In the **Date and Time Settings** dialog choose a date and click **OK**.
  - c. Kind. Select the Kind property value cell and choose a milestone kind: In Service.

5. Click **Close** > **OK**.

To create new milestone with kind Out Of Service

1. In the **Select Actual Project Milestone** dialog, switch on the **Creation Mode**.
2. Select package where you want to create an Actual Project Milestone.

3. Click **Create**.

4. In the Specification window of the newly created Actual Project Milestone specify three properties:
- Name. Type a name of the Actual Project Milestone.
  - Start Date. Define the end of a period. Select the Date property value cell and click . In the [Date and Time Settings dialog](#) choose a date and click **OK**.

- c. Kind. Select the Kind property value cell and choose a milestone kind: Out Of Service.

**Specification of Actual Project Milestone End Phase 1**

**Specification of Actual Project Milestone properties**

Specify properties of the selected Actual Project Milestone in the properties specification table. Choose the Expert or All options from the Properties drop-down list to see more properties.

**End Phase 1**

Properties: Standard
