# Creating C1-S1 matrix

The Capability to Services Mapping Matrix depicts which Services contribute to the achievement of a Capability directly or using the implied relations. The rows of this matrix represent Services and the columns represent Capabilities.

To create C1-S1 matrix

1. Specify the **Row Scope** (Services).
2. Specify the **Column Scope** (Capabilities).
3. Click the **Refresh** button.

Services exhibit Capabilities using the Exhibits relationship.

To map a Service to a Capability

* Double-click an empty intersection.

To remove the relation

* Double-click a full intersection between the desired elements.
