

# Working with S1 Service Taxonomy Table

The **Service Taxonomy Table (S1)** provides all the available service types.

To add a new Service or Service Architecture in the Service Taxonomy table

---

1. In the table toolbar, click the **Add New** button and choose Service or Service Architecture. A new row is added.
2. Double-click the cells to enter a Name, Definition, and URI for the Service or Service Architecture.

To add an existing Service or Service Architecture in the Service Taxonomy table

---

1. In the diagram toolbar, click the **Add Existing** button.
2. In the **Select Service** dialog, choose the desired Services or Service Architectures.
3. Double-click the cells to enter a Name, Definition, and URI for the Services or Service Architectures.
