Working with P1 Resource Types Table

The **Resource Types Table (P1)** provides all the available resource types.

To add a new element in the Resource Types table

1. In the table toolbar, click the **Add New** button and choose from the following:
   * Capability Configuration
   * Known Resource
   * Natural Resource
   * Organization
   * Person
   * Post
   * Project
   * Resource Architecture
   * Resource Mitigation
   * Resource Service
   * Responsibility
   * Security Enclave
   * Software
   * System
   * Technology
     A new row is added.
2. Double-click the cells to enter a Name, Definition, and URI for the added element.

To add an existing element in the Resource Types table

1. In the diagram toolbar, click the **Add Existing** button.
2. In the **Select Resource Performer** dialog, choose the desired operational concept (Capability Configuration, Known Resource, Natural Resource, Organization, Person, Post, Project, Resource Architecture, Resource Mitigation, Resource Service, Responsibility, Security Enclave, Software, System, Technology).
3. Double-click the cells to enter a Name, Definition, and URI for the added Resource Performer.
