# Working with Typical Measurements table

To create a Typical Measurements table

---

1. Do one of the following:
   - Click the **Add New** button and from the drop-down list select Property Set. The new row in the table is created. Type the name of the Property Set and specify the Measurements of the selected Property Set.
   - Click the **Add Existing** button to add an existing Property Set to the table.
2. Click the **Evaluate Measurements** button to create the Actual Measurements table automatically.

In the Typical Measurements table, you can select one of the Display Modes:

- **Owned Measurements** - collects only owned measurements.
- **All Measurements** - collects all measurements hierarchically with primitive types.

The created instances are stored in the same location as the Typical Measurements table.
