## Publishing from graphical user interface

Publishing a model from the graphical user interface is a quick way to share it on the web with other team members or stakeholders.

## **Publishing prerequisites**

- The Cameo Collaborator Publisher plugin must be installed in your modeling tool.
- Compa Callaborator for Magic Callaboration Studio works only with Magic Callaboration Studio projects. If your

## Recommendations

- · If you intend to publish a large model, increase the default JVM heap size of the Cameo Collaborator Publisher plugin as follows:
  - 1. Go to the <modeling\_tool\_installation\_directory>/bin directory and open the <modeling\_tool\_name>.properties file.
  - 2. Increase the -Xmx value, e.g., -Xmx4000M.

To publish a Cameo Collaborator document

- 3. Save and close the file.
- 1. Starepending contrete and the model would tend to any bishortly cate a sufficient amount of memory to your modeling tool:

Publishing from a historical version of a model can build be a model as well. However note that the commenting, editing, and

comment-import functionalities in such a document will be disabled.

- 2. In the main menu, select Tools > Cameo Collaborator > Publish.
- 3. In the Cameo Collaborator Publisher dialog, specify the following properties:
  - · Document name enter the name of the published document. By default, the document name is the same as the model name.
  - Category name select the Magic Collaboration Studio category where the published document will be stored.
  - and select the Package or several Packages containing the data you want to publish.
  - Template select the template for publishing. You can select one of the predefined templates or a custom template used in your model.

if you want to select a locally stored template or a template stored in Magic Collaboration Studio.

Updating projects update a published model, specify the same template that you used before. Otherwise, the navigation between comments and commented items will be corrupted. To restore corrupted navigation, update the document again using the initial template.

- 4. If needed, change the following options (click the Options button to see the full option list):
  - Select the Comments in project check box, to save Cameo Collaborator comments in the project as model elements.

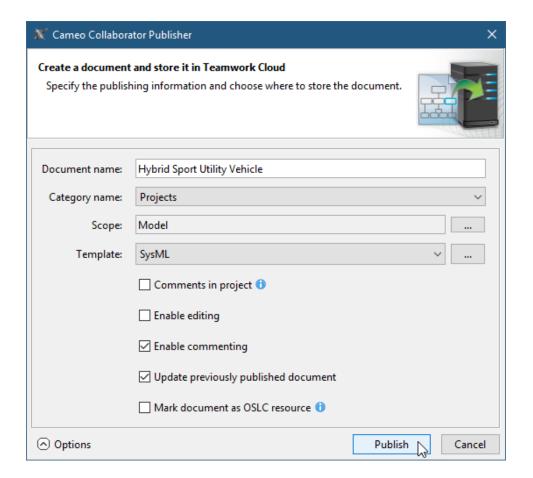

Saving comments in the project comments in the project when updating a document, you can migrate the existing

comments from the document to the project. However, you will not be able to migrate the comments from the project back to the

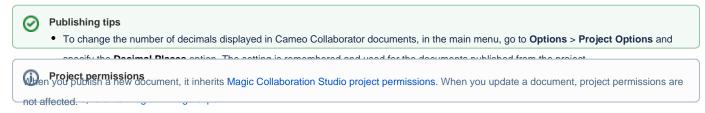

- Select the Enable editing recknowns allow editing the comments in a Cameo Collaborator document.
  Select the Enable commenting check-box, to allow reviewers to create comments in a Cameo Collaborator document.
- Selectable Update previously build is red project. check-box, to update the document previously published from this model with the same name. If you select this check box when publishing a model for the first time, the model will be published as new.

Projects reverted to an earlier version by the projects reverted to an earlier version of the projects reverted to Magic Collaboration Studio. If you update a document from the model that has been reverted to an earlier version (without the template used in it), you will corrupt the

- Select the Mark decument as OSL Cresource check-box atompublish the model asian OSL Cresource code.
- 5. Click the Publish button.

Wait until you get the message that the document is successfully published, as publishing a large document may take some time. In addition, the message allows you to copy or open the document URL. For the URL to work, in the main menu, go to **Options** > **Environment** and specify the **Cameo Collaborator URL** option.
