## **Assigning Behavior Type**

A behavior type is a behavior that is performed when the transition fires.

To assign a behavior type, do one of the following

- In the Containment tree, select a behavior type element and drag it to the selected transition on the diagram.
- In the transition's Specification window > Effect category, click the Behavior Type property value cell and select the behavior from the list.

According to the selected behavior, additional corresponding properties will appear in ≙ the Effect category. Specify desired properties.

🗄 Effect		Effect	
Behavior Type	<unspecified></unspecified>	Behavior Type	FunctionBehavior
Behavior Element		Behavior Element	[for transition::::]
		Name
