

# Accepting and rejecting changes using shortcut menu

You can accept and reject changes using the toolbar that is located at the top of the **Merged Result** window or using the shortcut menu in all panels.

The following table lists the commands of the shortcut menu that can be opened when an element is selected in the **Merged Result** tree/list.

Command	Description
<b>Accept</b>	Click to accept the selected change. If the change has equivalent changes, they are accepted too.
<b>Reject</b>	Click to reject the selected change. If the change has equivalent changes, they are rejected too.
<b>Accept With Properties</b>	Click to accept the selected change and its property changes.
<b>Reject With Properties</b>	Click to reject the selecting change and its property changes.
<b>Accept Recursively</b>	Click to accept the selected change, its property changes, and all owned element changes in the <b>Merged Result</b> tree view.
<b>Reject Recursively</b>	Click to reject the selected change, its property changes, and all owned element changes in the <b>Merged Result</b> tree view.
<b>Mark as Resolved</b>	Click to mark the conflicting change as resolved by the user, but not automatically.
<b>Select Original Location(s)</b>	If the selected instance of a moved element is in the new location, the <b>Select Original Location(s)</b> command appears on the shortcut menu. Click it to navigate to and select the original location(s) of the moved element in the <b>Merged Result</b> tree.
<b>Select New Location(s)</b>	If the selected instance of a moved element is in its original location, the <b>Select New Location(s)</b> command appears on the shortcut menu. Click it to navigate to and select a new location(s) of the moved element in the <b>Merged Result</b> tree.
