Inspecting differences in the Change details panel

The **Change details** panel displays a tree structure reflecting the differences between the two versions of either the element selected in the **Differences** tree or the property selected in the **Specification** panel. If several elements or properties are selected, then all changes that have been detected in these elements or properties accordingly will be displayed in the **Change details** panel. The panel is located above the **Specification** panel on the **Difference Viewer** window.

The panel contains a tree structure that has 1 top-level branch – Changes.

Change Details	004
Changes	
白···· ◇ Added [Property] to [Class]	
ÉDependent changes	
Set [Property].association to Association[magidibrary::domain::Item::CD / DVD - magidibrary::domain::Item::]
