

Importing an OWL ontology to a concept model

This section provides a simple, step-by-step guide to get you started on creating a concept model from an OWL ontology. This section is divided into several subsections with clear steps for you to follow.

Those subsections are:

- [Updating the XML catalog file](#)
- [Setting the OWL import catalog in MagicDraw](#)
- [Creating a path variable to share OWL import catalog files](#)
- [Using a path variable to share OWL import catalog files](#)
- [Importing an OWL ontology file](#)
- [Displaying and hiding IRI](#)
