

# Exporting your concept model to an OWL ontology

In this section, you will find a series of pages outlining the process in exporting your concept model to an OWL ontology. The process is as follows:

- [Setting destination for the OWL export folder](#)
- [Setting the concept model export syntax](#)
- [Setting the concept model export URI style](#)
- [Setting the concept model URI](#)
- [Specifying file export paths](#)
- [Specifying IRI ontology versions](#)
- [Use Path Variables to Export a Concept Model to an OWL Ontology](#)
- [Exporting your concept model](#)
- [Exporting models and concept models at any level in package hierarchy](#)
- [View the MCM watermark in an exported OWL](#)
