

C4 Standard Processes

Description

The C4 Standard Processes view specifies Standard Operational Activities, and optionally traces them to the capabilities they support. Some processes are standard across the whole enterprise, or even more than one enterprise. The Standard Operational Activities can be re-used across multiple logical architectures (e.g. in [L4](#)).

The C4 view may be used to:

- Specify a doctrine.
- Trace capabilities to enduring tasks.
- Trace capabilities to standard operational activities.
- Audit a capability.

Implementation

The C4 view can be represented using a C4 diagram which is an editable Dependency Matrix. The Capabilities will be used as row elements and the Standard Operational Activities will be used as column elements.

	Assistance	Land SAR	Maritime SAR	Recovery	SAR	Search	UK SAR Capability
Coordinate Other Agencies(context Land SAR)		✓					
Find Victim							
Firefight		✓
