

# Pre-merge check

Use the optional pre-merge check functionality to check permissions and prepare for branch merging.

How to perform the pre-merge check

---

1. Open the project that will be the [target](#).
2. Select **Tools > Project Merge**.
3. Select the project that will be the [source](#).
4. Click the **Pre-merge check** refresh icon:

This checks if you can execute this merge, i.e., if you have sufficient permissions and a valid model structure.
