

System requirements

Cameo Collaborator for Teamwork Cloud is a web-based product and supports the latest versions of the following browsers:

- Microsoft Edge
- Chrome
- Firefox
- Safari

System requirements for small and medium deployments

Small and medium deployments are deployments where 5, 10, 25, or 50 connection licenses are used.

System requirements:

- 32 GB of RAM devoted exclusively to Cameo Collaborator for Teamwork Cloud
- 100 GB of free space on the disk, preferably SSD
- CPU with 8 cores running at 2.1 GHz
- Windows 2016, Windows 2019, Linux 64-bit RedHat/CentOS 7, or RedHat 8
- Java 17
- For deployments on Linux, the open file limit must be no less than 20,000 files.

System requirements for large enterprise deployments

Large enterprise deployments are deployments where 75, 100, or unlimited connection licenses are used.

System requirements for deployments using 75 or 100 connection licenses:

- 64 GB of RAM devoted exclusively to Cameo Collaborator for Teamwork Cloud
- 200 GB of free space on the disk, preferably SSD
- CPU with 16 cores running at 2.1 GHz
- Windows 2016, Windows 2019, Linux 64-bit RedHat/CentOS 7, or RedHat 8
- Java 17
- For deployments on Linux, the open file limit must be no less than 20,000 files.

Deployments with unlimited licenses

If you have a deployment with an unlimited license or are in doubt about what hardware to use, contact your account executive for hardware recommendations to accommodate your specific needs.
