

Document view modes

You can view a Cameo Collaborator document in several different view modes:

- **Model view:** In this view mode, the [content pane](#) of a document portal shows only the content of the item selected in the [navigation pane](#). In addition, the Model view shows model information and is the default mode of a Cameo Collaborator document.
- **Document view:** This mode hides model details and allows you to browse a Cameo Collaborator document continuously. You can scroll through the entire content of the selected model view, or select an item in the navigation pane to load the related content.
- **Wiki view:** Similar to the Document view, The Wiki view hides model details while displaying the content of just one section, like the Model view.

To change the view mode of a Cameo Collaborator document

1. In the app bar of a Cameo Collaborator document, click ▼ and select the model view whose view mode you want to change.
2. On the right side of the app bar, click ⋮.
3. In the open menu, click **Active view** and select the desired view mode.

After changing the document view mode, the selected model view is reloaded and displayed in a new mode.
