# FAQ about used projects in 3DEXPERIENCE

Can I import a used project?

The **3D**EXPERIENCE platform does not support importing used projects.

Can I remove a used project but keep the references?

The **3D**EXPERIENCE platform does not support recovered elements. Thus, you cannot remove used projects while keeping the references. You only have the option to remove a used project together with its references, as shown below:

Removing a used project.

I cannot open a project that uses other projects and see a message that a used project is missing. Why?
If you do not have access to a used project or it is deleted, you cannot open the main project. You must have access to all content that is used in the main project.

Why can I not see the option to export packages to a new project?

The **3D**EXPERIENCE platform does not support exporting packages to a new project.
