

Security Parameters

Description

The Security Parameters (Sc-Pm) domain depicts the measurements of resources.

The intended usage of the The Security Parameters (Sc-Pm) domain includes:

- Definition of performance characteristics and measurements.
- Identification of non-functional requirements.

Implementation

The Security Parameters (Sc-Pm) domain is represented by:

- [Environment diagram](#).
- [Typical Measurements table](#).
- [Hierarchical Typical Measurements table](#)
- [Actual Measurements table](#).
- [Security Parametric. Operational diagram](#).
- [Security Parametrics. Resource diagram](#).
- [Actual Measurements \(.xlsx\)](#).
