This is the home page of Cameo Systems Modeler documentation.

Cameo Systems Modeler is based on the award-winning MagicDraw modeling platform. The solution retains all the best diagramming, collaboration, persistence, and documentation capabilities while offering more customized capabilities tailored to **systems engineering** needs.

The documentation of Cameo Systems Modeler is a package that includes the documentation of these products and plugins:

MagicDraw Documentation	SysML Plugin Documentation	Cameo Requirements Modeler Plugin Documentation	Cameo Simulation Toolkit Documentation	Installation and licensing
Introduces the main features of modeling tool: working with projects, UML 2 modeling and diagramming, collaboration capabilities, and many more core features.	Provides descriptions of SysML diagrams and elements, plus introduces SysML specific features as well as gives guidelines for building systems.	Guides you through the import, export, and management of SysML requirements.	Provides the instructions about how to use the product for simulation.	Provides the instructions about how to install and license the product.
