# **MODAF. SV-12 Service Provision**

## Description

The SV-12 defines the relationships between the Capability Configurations and Services.

#### Implementation

SV-12 can be represented using a SV-12 diagram which is an editable Dependency Matrix. The Service Interfaces will be used as the row elements and the Resources will be used as the column elements.

## Sample

SV-12 Service Provision

#### Related views

The service attributes defined in SOV-1 can be given values in an SV-12 and related to the environment under which those values are true.

#### Related elements

- Resource Artifact
- Software
- Capability Configuration
- Organization
- Post
- Service Interface
- Service
- Request
