## **CV-5 Capability to Organizational Development Mapping**

## Description

The CV-5 addresses the fulfillment of capability requirements.

This model shows the planned capability deployment and interconnection for a particular Capability Phase. The CV-5 can also be used to support the capability management process and, in particular, assist the planning of fielding.

The intended usage of the CV-5 includes:

- Fielding planning.
- · Capability integration planning.
- Capability options analysis.
- Capability redundancy/overlap/gap analysis.
- · Identification of deployment level shortfalls.

## Implementation

CV-5 can be represented using:

- A CV-5 table.
- A CV-5 spreadsheet report.

Maritime Rescue Team expansion (From 2011-01-01 To 2011-03-31)	C Hire new MRT Drivers	C Hire new MRT Pilots		
A HR Manager	● ERP	● ERP	ERP     PM Software	
A Jr HR Manager	● ERP	● ERP	● ERP	
A Qualified Helo Pilot				MRT Pilot Helicopter
A Qualified Lifeboat Driver				A <sup>™</sup> MRT Driver  Boat

To conduct a comprehensive analysis, several CV- 5 can be created to represent the different Enterprise Phases. Each CV-5 represents different Enterprise Phases defined in CV-1 Vision.

The CV-5 shows deployment of Capabilities defined in CV-2 Capability Taxonomy to specific organizations.

Deployed or No Longer Used Resources are taken from SV-1 Systems Interface Description or SvcV-1 Services Context Description.

Actual Organizational Resources are taken from OV-4.

The timing is based on PV-2 Project Timelines indicating delivery of Capabilities to actual organizational resources, and also the point at which those organizational resources cease to use a particular Capability.
