Creating SV-9 table

To create an SV-9 table

1. Add Rows to the table by doing any of the following:
    * Adding a new Resource as the row Header: click the **Add New** button, select a Resource and its owner.
    * Adding an existing Resource as the row Header: click the **Add Existing** button and select one or more existing Resource.
2. Add columns to the table by clicking the **Time Period** button. The **Time Periods** dialog opens. Specify the forecast time periods:
    * Select or create a Timeline package to store the Forecast dates.
    * Select the Forecast Kind.
    * Specify additional options needed according to the selected Forecast Kind.
3. Enter the Subjects of Forecast by clicking the **…** button on the cell you want to fill in and select the Resources, Standards, Protocols, or Competencies to forecast. Specify the date of the Forecast.

> ⓘ   By default the date is the starting date of the selected time period.
