

Creating P1 Service Provision matrix

The rows in a P1 Service Provision matrix represent Service Interfaces and the columns represent Resources.

To create a P1 Service Provision matrix

1. Specify the **Rows scope** (Service Interfaces).
2. Specify the **Columns scope** (Resources).
3. Click the **Rebuild** button.

The cells in the matrix represent a Service or Request Port. If a resource provides a Service Interface, the Service Port icon will be displayed. If it requests a Service Interface, the Request Port icon is displayed.
