2021x Version News

Discontinued Products

- The development of the following plugins is discontinued:
  - Document Modeling Plugin (Model-based reports). For more effective model publishing and reviewing on the web, use Cameo Collaborator.
    - To create Views and Viewpoints diagrams using the modeling tool with no plugins installed, use the Cameo Collaborator Publisher plugin or the SysML plugin instead.
    - The DockBook Library Profile is no longer available.
  - Methodology Wizard Plugin.
  - QVT Plugin.
  - Excel Import Plugin. We highly recommend using Excel/CSV Sync or Excel/CSV Import features instead.
  - CSV Import Plugin. We highly recommend using Excel/CSV Sync or Excel/CSV Import features instead.
  - LieberLieber Embedded Engineer plugin.
  - Project Element Counter plugin.
  - MBSE plugin.
- Web portal reports are no longer available. For more effective model publishing and reviewing on the web, use Cameo Collaborator. You can also use Web Publisher (Simple HTML) or Web Publisher 2.0 ReportWizard templates to generate HTML reports.
- WSDL Code Engineering and WSDL diagrams are no longer available.
- C# Code Engineering and C# Professional Edition are no longer available.
- CIL and CIL Disassembler Code Engineering are no longer available.
- The News Reader (RSS) is no longer available. The notification at the right bottom corner of the modeling tool will inform you about the new version release instead.
- The *no_install_mac.zip* and *32-bit* installation files are no longer offered for download.
- The Project Usage Map Profile is no longer available.
- The JavaScript Nashorn is deprecated with the intention of removing it. We highly recommend using JavaScript Rhino instead.
- The following 3rd party plugins are discontinued:
  - Cameo Workbench
  - Cameo Inter-Op
  - ParaMagic Lite
- The following no cost plugins are no longer available in modeling tools:
  - FAS. From now on, download it here: https://sourceforge.net/projects/fas4md.
  - SYSMOD. From now on, download it here: https://sourceforge.net/projects/sysmod4md/.

As of 19.0 version, the Document Modeling Plugin is no longer required when installing the UPDM 2 plugin. Despite that you can still create and work with the Views and Viewpoints diagrams. You must install the Document Modeling Plugin if you wan to generate the following web reports:

- DoDAF Web Report
- MODAF Web Report
- NAF Web Report
- NAF 4.0 Web Report
