Managing Resources in SvcV-8 diagram

Before assigning Resources, make sure they have Increment and Out of Service milestones specified. If the Resource does not have milestones specified, you are able to see it in the SvcV-8 diagram.

To assign a Resource, do either

- Right-click the Version of Configuration and select **Resource**. From the **Select Resource** dialog choose the desired Resource and click **OK**.
- Select a Resource in the Containment tree and drag it to the Version of Configuration

To remove a Resource

1. Right-click the Resource bar and from the shortcut menu, select **Remove Resource** > <name of the resource you want to remove>.
