## **MODAF Service Oriented Viewpoint**

The Services View (SOV) shows the elements that are part of SOV-1 through SOV-5.

The Service-Orientated View is a description of services needed to directly support the operational domain as described in the Operational View. A service is described as a unit of work through which a particular Resource provides a useful result to a consuming Resource.

The views of this viewpoint are described in the following sections:

- MODAF. SOV-1 Service Taxonomy
  MODAF. SOV-2 Service Interface Specification
  MODAF. SOV-3 Capability to Service Mapping

- MODAF. SOV-4a Service Constraints
  MODAF. SOV-4b Service State Model
  MODAF. SOV-4c Service Interaction Specification
- MODAF. SOV-5 Service Functionality Flow
