The NATO Architecture Framework (NAF) is a standard for developing Enterprise Architectures. An Enterprise Architecture is a model of a current or future state of an enterprise. An enterprise could be an organization, a system (including the human factors) or a project. The purpose of enterprise architecture is to capture the complex dependencies that exist in large-scale systems of systems so as to aid with decision support. NAF provides a standard way to model the architecture.

	Taxonomy	Structure	Connectivity	Behaviour	Information	Constraints	Roadmap
				Processes	States	Sequences	
Concepts	C1 Concepts	C2 Concepts	C3 Concepts	C4 Concepts	C5 Concepts	C6 Concepts	C7 Concepts
Service Specifications	S1 Service	S2 Service	S3 Service	S4 Service	S5 Service	S6 Service	S7 Service
Logical Specifications	L1 Logical	L2 Logical	L3 Logical	L4 Logical	L5 Logical	L6 Logical	L7 Logical
Physical Resource Specifications	P1 Physical	P2 Physical	P3 Physical	P4 Physical	P5 Physical	P6 Physical	P7 Physical
Deployed Resources	D1 Deployed	D2 Deployed	D3 Deployed	D4 Deployed	D5 Deployed	D6 Deployed	D7 Deployed
Architecture Meta-Data	A1 Architecture	A2 Architecture	A3 Architecture	A4 Architecture	A5 Architecture	A6 Architecture	A7 Architecture
