## Managing Resources in SvcV-8 diagram

Before assigning Resources, make sure they have Increment and Out of Service milestones specified. If the Resource does not have milestones specified, you are able to see it in the SvcV-8 diagram.

To assign a Resource, do either

- Right-click the Version of Configuration and select Resource. From the Select Resource dialog choose the desired Resource and click OK.
- Select a Resource in the Containment tree and drag it to the Version of Configuration

## To remove a Resource

Right-click the Resource bar and from the shortcut menu, select Remove Resource > <name
of the resource you want to remove>.
