Creating StdV-1 table

To create an StdV-1 table, do either

- Add a new element by clicking the **Add New** button. In the **Create element** wizard select element and its owner.
- Add the existing elements by clicking the **Add Existing** button and in the **Select UPDM element** dialog select the elements.
- Assign one or more Standards or Protocols to each row that the particular UPDM element must conform to by clicking the **…** button on any cell in the **Standard/Policy** column.
