

# Creating Pr diagram

To create a Pr diagram

- 1 [Create new Version Of Configuration](#)
- 2 [Define the resource for the Version Of Configuration](#)
- 3 [Specify Actual Project Milestones of the resource](#)

## Create new Version Of Configuration

To create new Version Of Configuration in Pr diagram

1. Click the **Add New** button. New Version of Configuration is created.
2. Type its name.

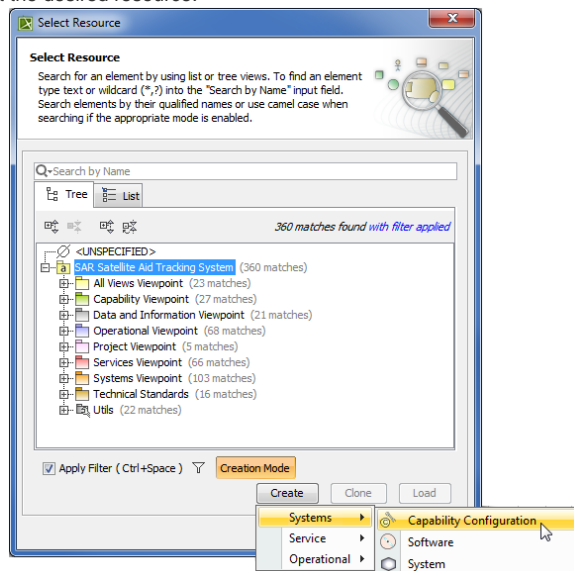

## Define the resource for the Version Of Configuration

To define the resource for the Version Of Configuration

1. Right-click the Version Of Configuration in the diagram pane and select **Resource**.
2. In the **Select Resource** dialog do one of the following:
  - Select an existing resource that has milestones defined.
  - Create new resource (described in the following procedure).

To create new resource for the Version Of Configuration

1. In the **Select Resource** dialog switch on the **Creation Mode**.
2. Select package where you want to create a resource.
3. Click the **Create** button, choose a resource category **Systems**, **Service**, or **Operational**, and select the desired resource.

4. In the Specification window of the newly created resource type its name.

## Specify Actual Project Milestones of the resource

Each resource must have two Actual Project Milestone kinds defined:

- Increment Milestone (defines the start of a period).
- Out Of Service Milestone (defines the end of a period).

To specify Actual Project Milestones of the resource

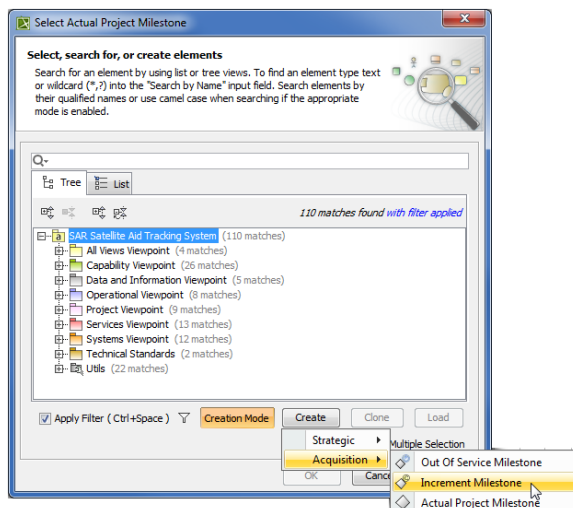

1. On the left of the resource Specification window, select the **Milestones** property group.
2. Click the **Add** button to define an Actual Project Milestone for the resource.

3. In the **Select Actual Project Milestone** dialog do one of the following:
  - Select an existing Actual Project Milestone.
  - Create new Actual Project Milestone (described in the following procedure).
4. Click **Close** to close the Specification window of an Actual Project Milestone.

To create new Actual Project Milestone of the resource

1. In the **Select Actual Project Milestone** dialog switch on the **Creation Mode**.
2. Select package where you want to create an Actual Project Milestone.
3. Click the **Create** button, choose an Actual Project Milestone category **Strategic**, or **Acquisition**, and select the desired milestone kind.

4. In the Specification window of the newly created milestone specify two properties:
  - **Name**. Type a name of the the milestone.

- **Date.** Select the Date property value cell and click

**? Unknown Attachment**

. In the **Date and Time Settings** dialog choose a date and click **OK**.

**Specification of Increment Milestone Start Phase 1**

**Specification of Increment Milestone properties**  
Specify properties of the selected Increment Milestone in the properties specification table. Choose the Expert or All options from the Properties drop-down list to see more properties.

**Start Phase 1**
