

# Instantiating Structures

Use [Automatic Instantiation wizard](#) to instantiate any typical structure of UPDM architecture automatically.

To open the [Automatic Instantiation wizard](#)

1. Select any number of instantiable UPDM elements and right-click them.
2. On the shortcut menu, choose **Tools > Create Instance**.  
The **Automatic Instantiation** wizard opens.

To instantiate the proposed typical structure

1. Select all typical classes you want to instantiate in a diagram pane or in the Model Browser.
2. Right-click on the selected typical UPDM elements and select **Tools > Create Instance**.
3. Follow the steps of the [Automatic Instantiation wizard](#).
4. Click **Finish** when you are done.  
A new **OV-4 Actual** diagram is created.

For instantiable UPDM elements corresponding actual elements are created. For example, by instantiating Organization results in Actual Organization and etc. For all other structural elements UML Instance Specifications are created.

| Typical UPDM element                                                                                                                               | Actual UPDM element                           |
|----------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------|
| Project Type                                                                                                                                       | Project (DoDAF), Actual Project (MODAF / NAF) |
| Project Milestone                                                                                                                                  | Actual Project Milestone                      |
| Project Theme                                                                                                                                      | Project Status                                |
| Project Milestone Role                                                                                                                             | Actual Project Milestone Role                 |
| Organization                                                                                                                                       | Actual Organization                           |
| Organization Type                                                                                                                                  | Organization                                  |
| Sub Organization (Resource Role typed by and owned by Organization Type (DoDAF) or Organization (MODAF / NAF))                                     | Actual Organization Role                      |
| Person Type                                                                                                                                        | Individual Person Role                        |
| Post                                                                                                                                               | Actual Post                                   |
| Post Role (Resource Role typed by Person Type (DoDAF) or Post (MODAF / NAF) and owned by Organization Type (DoDAF) or Organization (MODAF / NAF)). | Actual Organization Role                      |
| Person                                                                                                                                             | Actual Person                                 |
| Measurement Set                                                                                                                                    | Actual Measurement Set                        |
| Measure Type                                                                                                                                       | Measure                                       |
| Measurement                                                                                                                                        | Actual Measurement                            |
| Geo Political Extent Type                                                                                                                          | Geo Political Extent                          |
| Location Type                                                                                                                                      | Actual Location                               |
| Location                                                                                                                                           | Actual Location                               |
| Capability Configuration                                                                                                                           | Fielded Capability                            |
