

Creating SvcV-5 matrix

SvcV-5 Operational Activity to Services Traceability Matrix describes the mapping of services back to operational activities. The rows of this matrix are Service Accesses and the columns are Operational Activities.

To create a SvcV-5 matrix

1. Specify the **Row Scope** (Service Accesses).
2. Specify the **Column Scope** (Operational Activities).
3. Click the **Rebuild** button.

Service Accesses maps to Operational Activities through transitive relationship. It consists of mapping between Operational Activities and Functions using Implements relationship and mapping between Service Accesses and Functions using Activity Performed by Performer relationship.

The SvcV-5 Operational Activity to Services Traceability Matrix is non editable.
