Modeling tools licensing

In this chapter, read about:

The product license is identified by the license key. The license key is a license key file: *.lic or *.txt.

There are two main types of licenses: *Seat* (also known as *Nodelock*) and *Floating* (also known as *Shareable*).

- The *Seat* license allows using the tool on the particular machine it is installed.
- The *Floating* license can be shared among a number of users over time.
