# Properties tab

The **Properties** tab at the bottom of the Model Browser allows you to quickly access basic information about a selected element or diagram.

An example of the Properties tab in the Quick properties panel
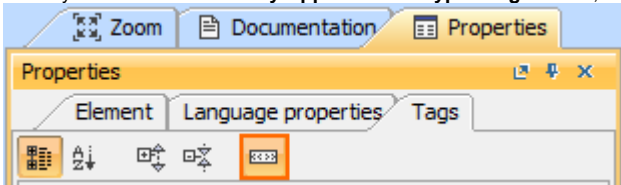

✅ **Multiple selection**

- If multiple elements or symbols of different kinds are selected, only their common properties are displayed in the **Properties** tab.

- If more than 10 elements in the Containment tree or symbols on the diagram pane are selected, properties are displayed only by request. You need to click the link **Show common properties for the selected items**.

To open the **Properties** tab, do one of the following

- In the Model Browser, click the **Properties** tab.
- On the **Window** menu, click **Properties**.

The **Properties** tab includes the following tabs:

Tab name	Description
Element	Contains the main properties of the element's or diagram's specification.
Symbol	Contains the element symbol's properties. ⚠️ This tab is available for symbols only.

Tags	Contains the tagged values of the selected element. When you click the **Show Only Applied Stereotypes Tags** button, only the tabs with values are listed.
Language properties	Contains the same data as the **Language Properties** property group in the element's **Specification** window. ⚠ This tab is available only for the elements used for code generation, that is, class, attribute, operation.
Traceability	Contains the same data as the **Traceability** property group in the element's **Specification** window.
