After clicking OK, a progress bar will appear.

Cour project is a Teamwork Cloud (TWC) project, Concept Modeler will attempt to lock the project's elements.

• If any of the elements cannot be locked, whether it is locked by another user, then the dialog box with the OK button will say "Cannot lock all The following example shows you how to change the tagged value **definition** to an unspecified preferred annotation property. elements for edit to allow preferred annotations to be used as element documentation. You may refer to the Lock View tab to see what still

needs to be locked."

To change a current preferred annotation property tagged value to an unspecified preferred annotation property tagged value Furthermore, an additional message will appear in the notification window saying "The preferred annotation property change has been reverted."

After these two filessages with appear, the project The Project Options dialog opens, to its previous value. 2. In the left pane of the dialog, select General and Concept Modeling.

Click next to Preferred annotation property. The Select Property «Annotation Property» dialog opens.
 Select <UNSPECIFIED> and click OK.
