

BPMN Business Data Description Table

Description

A BPMN Business Data Description table is designed to display or edit class descriptions in a table form. You can display existing classes or create new classes in this table.

Example

#	△ Name	Documentation
1	 Agreement	Agreement is signed between attendee and Training Center. All details (duration, time, place etc.) about training/consultation is described in agreement.
2	 Attendee	Attendee is a person who is participating in a training event.
3	 Attendee Request	Request form filled by attendee for training/consultation
4	 Dedicated Training / Consultation	Dedicated trainings/consultations are provided for a companies. Consultations may include training classes, best practice sessions, model reviews, and design sessions.
5	 Feedback Form	Attendee leave feedback about training/consultation. Also attendee evaluates trainer. Future training programs can be modified according to collected feedback.
6	 Invoice	Invoice can be sent for participating in open training class or for dedicated training/consultation. All invoices are managed by accounting department.
7	 Open Enrollment	Open Enrollment classes are performed regularly in different locations.
8	 Training Event	There are two types of Training Events: Consultation and Open Enrollment. Each Training Event should have a Start Date and Duration defined.
