## **Cameo Systems Modeler Documentation**

## Docs of other versions

- Cameo Systems Modeler 18.5
- Cameo Systems Modeler 18.4
- Cameo Systems Modeler 18.3
- Cameo Systems Modeler 18.2

This is the home page of Cameo Systems Modeler documentation.

Cameo Systems Modeler is based on the award-winning MagicDraw modeling platform. The solution retains all the best diagramming, collaboration, persistence, and documentation capabilities while offering more customized capabilities tailored to systems engineering needs.

The documentation of Cameo Systems Modeler is a package that includes the documentation of these products and plugins:

## **MagicDraw Documentation**

Introduces the main features of modeling tool: working with projects, UML 2 modeling and diagramming, collaboration capabilities, and many more core features.

## SysML Plugin **Documentation**

Provides descriptions of SysML diagrams and elements. plus introduces SysML specific features as well as gives guidelines for building systems.
