

Lock View tab

 The Lock View tab is displayed only when working with [server projects](#).

The Lock View tab is used to display what was locked in the project (locked elements, project structure, symbol styles) and by which users. Next to the locked element, you can see the name of the user who has locked it. Using the **Filter by user** list in the Lock View tab toolbar, you can see the elements, locked by the particular user.

To open the Lock View tab, do one of the following

- At the top of the Model Browser, click the **Lock View** tab.
- If the Containment tab is hidden, from the **Window** menu, select **Lock View**.

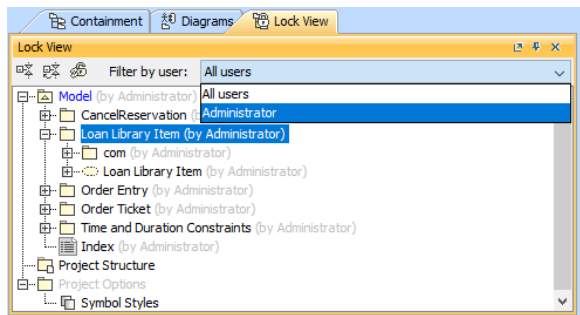

The Locked Elements tab consists of the following two components:

- Lock View tab toolbar
- Lock View tree

Lock View tab toolbar

The Lock View tab toolbar contains the following:

- **Update Lock Information** button
- **Filter by user** list

Using the **Filter by user** list you can select to display only the elements locked by the particular user.

Working with model elements in the Lock View tree

You can work with elements in the Lock View tree using the commands available from the selected element's shortcut menu. The shortcut menu contains the following commands:

Command	Function
Lock	Locks or unlocks the particular element for edit.
Select in Containment Tree	Opens the Containment tab and selects the current element in the Containment tree.
