Document Preview panel

The Document Modeling Plugin provides the ability to review a modeled document before generating a file. On the diagram pane, open the shortcut menu and click Document Preview. The preview panel opens.

The Document Preview panel consists of a document structure browser, preview panel, and actions toolbar.

Document Preview dialog

The following table describes all buttons listed in the Document Preview toolbar:

#	Name	Documentation
1	Refresh button	If you make any changes in the document model, you should refresh the view. On the panel's toolbar, click the Refresh button to refresh the document's view.
2	Search button	Opens the Find dialog that helps you search for a specific place in your document.
3	Save to PDF button	Opens the Save PDF dialog to save your document in the .pdf file format.
4	Save to HTML button	Opens the Save HTML dialog to save your document in the .html file format.
5	Save to XML button	Opens the Save XML dialog to save your document in the .xml file format.
