

# Creating a Document Model Project

A new Document Model project can be created in the same way as any other project in a modeling tool.

To create a new Document Model project

1. Create a new project in one of the following ways:
  - a. On the main menu, click **File > New Project** on the main toolbar
  - b. Click the **New Project** button, or
  - c. Press **CTRL+N**.
2. In the **Other** category, select the **Document Structure Model Project** icon.
3. In the **Name** text box, type a file name.
4. In the **Project** location text box, specify a project location.
5. In the **Use Project** box, specify a reference project that should be used by the new project you are creating.
6. In the **Document Structure Model** box, specify a project in which the document structure is modeled to use as a template for the new project you are creating.
