# Installing Cameo DataHub from the plugin source zip file
Cameo DataHub can also be installed from the source zip file of the plugin if you have downloaded it to your local file system.

To install DataHub from the plugin source zip file

1. From the MagicDraw® main menu, click **Help** > **Resource/Plugin Manager**. The **Resource/Plugin Manager** dialog opens.
2. Click Import to browse the local file system to locate the file.
3. After importing DataHub, click Close to close the dialog.
4. Restart MagicDraw®. The installation will be completed after MagicDraw® starts up.

> ✓ **Tip**
>
> - After the installation of DataHub, the DataHub menu items will not be enabled by default. They become enabled only when you open a new or existing project in MagicDraw®.
>
> - The **Create OSLC query** menu item is enabled after you add an IBM® Rational® DOORS® Next Generation Data Source.
