## General

DataHub allows you to select default options for mapping type and policy, filter, and synchronization through the General option group.

To modify the DataHub General option group

## 1. Open the Cameo DataHub Options dialog.

Environment Options		×
Cameo DataHub Options Change your various Cameo DataH	ub options and configurations.	
Type here to filter options     Type here to filter options     Sources     Sources	Cameo DataHub	
	Valdate and fix DataHub database when Syndrionize data when saving project. Set the Group Type Mapping as the default mapping. Filter a MagiCow data source from DataHub explorer	Never
	Mapping policy  Confirmation Show a confirmation dalog when synchronizing data.  Show a confirmation dalog about the loct Dirk Text format when conving or purchaseiting data.	Show mapping for elements without default mapping
	Show a confirmation dialog when deleting rode action. Show a confirmation dialog when deleting redirection. Show a confirmation dialog when deleting schema map.	V tue V tue V tue V tue
	Show a warning dialog when the schema being edited is used in another project. Show a warning dialog when copying data. Show a warning dialog when saving a text property that causes formatting lost.	☑ true ☑ true ☑ true ☑ true
	Show a confirmation dialog when removing DHLink. Show a confirmation dialog when removing DHLinks recursively. Show a confirmation dialog when replacing existing map.	∑ true ∑ true ∑ true
	Show a confirmation dailog when updating all pending DHLinks recursively. Show a confirmation dailog when updating all pending DHLinks. Show a confirmation dailog when updating Pending Update status. EI IBM Rational DOORS Next Generation	∑ twe ∑ twe ∑ twe

2. Under the **General** option, choose when validating and fixing DataHub database happen, select or clear the option of data synchronization when saving a project, setting the Group Type mapping as default, or filtering a MagicDraw Data Source from DataHub Explorer. If you want to select an option to display the mapping dialog, select one of the options in the **Mapping policy** drop-down list.

3. Click OK.

The following table explains the detail of Cameo DataHub options in the **General** option group

Option	Function
Validate and fix DataHub database when	<ul> <li>Shows options of when validating and fixing DataHub database happen in the drop-down list as follows</li> <li>Cleaning up DataHub database</li> <li>Starting DataHub and cleaning up DataHub database</li> <li>Never</li> </ul>
Synchronize data when saving project	Enables automatic synchronization with $MagicDraw^{\texttt{®}}$ when you save a project.
Set the Group Type Mapping as the default mapping	Sets the default mapping to group type mapping when copying data.
Filter a MagicDraw data source from DataHub explorer	Hides the display of MagicDraw <sup>®</sup> Data Sources in DataHub Explorer and shows the Data Sources when cleared.

Mapping policy	Shows options of displaying the mapping dialog that you can select in the drop-down list as follows
	<ul> <li>Always show the mapping dialog</li> <li>Show mapping for elements without default mapping</li> <li>Show mapping for elements that cannot be automatically mapped</li> <li>Show mapping for elements with an unknown data type</li> <li>Treat no-default mapping element as exclude.</li> </ul>
